Production Process

Production process with advanced equipment, excellent quality, and superior performance

Equipments

Annual production capacity - 1,400,000 cbm

Germany Pallmann Log Flaker

Buettner Air Dryer

Italy IMAL-PAL 3-layer Super Screens

Canadian Coil Mixer

Germany Siempelkamp Paving System

Siempelkamp 9th Continuous Press

Siempelkamp Cooling Flap System

SUFOMA Sanding

Factories

Tongxiang Factory

Main Products: Decorative Board

Annual Production Capacity: 5,300,000 sqm

Tancheng Factory

Main Products: OSB, F-OSB, Plywood

Annual Production Capacity: 500,000 cbm

Linyi Factory

Main Products: MDF, F-OSB, Decorative Board

Annual Production Capacity: 10,000,000 sqm

Pizhou Factory

Main Products: Particle Board, SPB

Annual Production Capacity: 600,000 cbm

Renhe Factroy

Main Products: Cabinet, Wardrobe, Closet, Wooden Door

Annual Production Capacity: 750,000 sqm

Rizhao Factory

Main Products: OSB, F-OSB, Particle Board

Annual Production Capacity: 300,000 cbm

About us

Name:	Treezo Group
Founding Year:	1999
Employees:	2500
Business Scope:	• Building Materials (OSB, Particle Board, Plywood, MDF) • Custom Home Furnishing (Wardrobe, Cabinet, Door, Flooring) • Prefab Wood Structure Building
Factories Number:	6
Head Office Location:	152 Haoyun Street, Liangzhu Street, Yuhang District, Hangzhou City, Zhejiang Province, China

Treezo OSB

Discover the strength and versatility of OSB (Oriented Strand Board), the go-to material for modern construction and interior design!

Whether you're building, renovating, or crafting furniture, OSB offers an unbeatable combination of durability, affordability, and sustainability.

Introduction

- Species: Pine
- Glue: MDI
- Size(mm): 1220*2440/2800 (Available on request)
- Thickness(mm): 9-30 (Available on request)
- Formaldehyde Emission Class: ENF (≤0.025mg/m³)
- Certificates: F ☆☆☆☆, CE, FSC®, JAS

Environmentally Friendly (Formaldehyde emission ≤ 0.013mg/m³)
Strong Screw-Holding
Impact Resistance (Internal Bonding Strength: 0.36 MPa ave)
Uniform Appearance
Water Resistance (24h Water Absorption Thickness Swelling Rate ≤ 10.8%)
Heat & Sound Insulation

Types of OSB boards

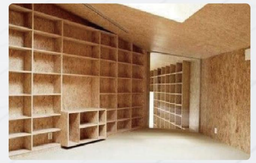

- OSB/1- Widely used as interior material in dry conditions for general purposes.
- OSB/2- Structural load-bearing boards suitable for use in dry conditions.
- OSB/3- Structural load-bearing boards suitable for use in damp to humid conditions.
- OSB/4- Structural heavy-duty load-bearing components for buildings in outdoor humid conditions, offering higher strength.

Area of use

- Structural base materials: roofs, walls, floors, stairs;
- Components: I- joist material, structural insulation material (SIP);
- Interior finishing materials: walls, ceilings, stores, garages, shelves;
- Interior products, structural material for furniture;
- Packing materials, pallet.

Particle Board (Chipboard)

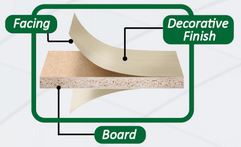

Introduction

- Species: Pine
- Glue: MDI
- Size(mm): 1220*2440/2800 (Available on request)
- Thickness(mm): 9-54 (Available on request)
- Formaldehyde Emission Class: ENF, E0, E1
- Certificates: CARB/EPA, F ☆☆☆☆, CE, FSC®

Uniform Appearance
Stable Quality
Environmentally Friendly

Area of use

- Finished particle board can be used to make kitchen cabinets, bathroom vanities and other furniture for any living areas.
- They are appropriate for the construct sections, wall panels and door.

Finishes can be made from melamine paper, PET, HPL, UV, PVC and wood veneer.
